

Recommended Regional Climate Advisory Committee Structure

- Board (Decision Making Body)
- Regional Climate Committee (Advisory)
- Staff (Implementation)
- Direct Management/Advisory
- Collaborative

The Regional Climate Committee (Advisory) would be a Board level advisory body that could consist of the HCAOG Board, and a Board member each from RCEA, HWMA, and HTA. A separate staff-level Regional Climate Technical Advisory Committee could also be formed (similar to HCAOG's existing Technical Advisory Committee) that could work collaboratively with and provide direction to the Climate Program Manager and make recommendations to the HCAOG Board. The Regional Climate Technical Advisory Committee could have additional memberships including Caltrans, Tribal Representatives, or utility districts.
